

## **Astrology: The Star Language of Life (lecture)**

Astrology is essentially the art and science of how celestial bodies (particularly the planets and the luminaries, Sun and Moon) effect human affairs on Earth. The word **Astrology** has a Greek derivation roughly meaning “star” (*aster*) “logic” or “language” (*logos*). As a professional astrologer I am an interpreter of the “star language” as it affects human life!

In this lecture you will learn about the 12 different “signs of the zodiac” (12 different expressions of personality traits), the 12 different “houses” (12 different areas of life) and the 2 most important “planets” (psychological drives within our psyche) – the Sun and the Moon. The Sun and Moon represent the dualities of Masculine and Feminine, Yang and Yin, Conscious and Unconscious, Day and Night, etc. inside all of us.

If you have any questions before class, please feel free to e-mail me at [grussrowe@cox.net](mailto:grussrowe@cox.net) or call me at (619) 347-5440.
