

Introduction to Numerology (lecture)

Numerology is the study of numbers and how they influence all of life, especially human life. In this practical lecture you will learn how numerology affects **YOUR** life specifically. I will explain how to calculate and interpret **YOUR**: (1) Life Path number, (2) Birthday number, and (3) first name Expression number. All of this can be determined easily just from your DATE OF BIRTH and FIRST NAME. I will give sample interpretations of lecture participant's Life Path number and how it works in combination with their Birthday number and first name Expression number. I will also give some impromptu interpretations of famous people that the audience would like to know more about, based on numerology (assuming the birth data is available online or known). **After this lecture you may well leave thinking, "What kind of a world do we live in where my name and date of birth says so much about me?!"**
