

Everyone takes in information using SENSING (S) and INTUITION (N) but....

The following 8 Myers-Briggs types prefer to take in information using INTUITION (N):

ENTJ, ENTP, INTJ, INTP, ENFJ, ENFP, INFJ, INFP

All “Intuitives” (N) Have These Things in Common:

- Are turned on by new ideas and possibilities
- Like doing things in untried, innovative ways
- Are impatient with routine, repetition and details
- Read between the lines and look for what was implied and inferred but not said
- Look for underlying patterns and meanings
- Follow their hunches, inspirations, insights, and imaginings – wherever they may lead!
- Think nonlinearly, jumping wherever their intuition takes them in the moment
- Find it hard to stay focused on the present
- Focus on “the big picture,” envision the future
- Can be unaware of the here and now or what is going on in their immediate surroundings
- Reach conclusions quickly, intuitively
- Enjoy abstract information, metaphors, analogies
